Level 2 Award in Cardiopulmonary Resuscitation & Automated External Defibrillation (QCF)

This regulated qualification is ideal for those who require further training or are looking to develop their knowledge and/or skills in this subject area. It is recommended as training for first aiders in the workplace environment who have access to a defibrillator. Learners gaining this qualification will know that cardiopulmonary resuscitation and automated external defibrillation form an essential part of the chain of survival.

How are these qualifications structured?

This qualification is made up of one mandatory unit, which learners must complete successfully in order to achieve the qualification. This is as follows:

Cardiopulmonary Resuscitation and Automated External Defibrillation Skills [J/503/1186].

Practical observation:

This is completed throughout the course. Learners must practically demonstrate the application of the correct techniques in all the areas indicated within the learning outcomes of the unit.

Oral / written examination:

This will be completed via ongoing questioning with learners on the course. This will require learners to demonstrate their knowledge and understanding in a number of first-aid related areas.

Certification:

All successful students will be issued with a CPR and AED certificate. This qualification is valid for a period of 3 years, at which point learners will need to re-sit the course.

What about requalification?

However, the recommendation is that learners refresh their knowledge annually.
