Level 3 Award in Paediatric First Aid (QCF)

This regulated qualification is aimed at those who wish to become a paediatric first aider in the workplace with a responsibility for the welfare of infants and children. This qualification is intended for learners already working or preparing to work in a childcare setting.

How are these qualifications structured?

This qualification is made up of two mandatory units and learners must successfully complete the assessment for both units to achieve the qualification. These are as follows:

**Emergency Paediatric First Aid; and
Managing paediatric illness, injuries and emergencies.**

Practical observation:

Assessment will involve learners demonstrating the application of the correct techniques in all the first-aid areas indicated within the learning outcomes of the unit. As well as practical demonstration, this will also be done orally or written, or a mixture of both throughout the course.

Oral / written examination:

This will be completed via ongoing assessment with the learners on the course. This will require learners to showcase their knowledge and understanding in a number of first-aid related areas. This can be done either through oral / written means or both.

Certification:

All successful students will be issued with a Paediatric First Aid certificate and card.

What about requalification?

This qualification is valid for a period of three years, at which point learners will need to re-sit the course. However, the recommendation is that learners refresh their knowledge annually.
